

## PRESS RELEASE FOR IMMEDIATE DISTRIBUTION

### **Montreal-based Ulrich Metrology Awarded 5-Year Contract by CAE**

**MONTREAL:** January 2, 2007 – Montreal-based Ulrich Metrology Inc. has been awarded a five-year contract by CAE to provide precision calibration and repair services for all of the aerospace company's measurement equipment. The multi-disciplinary range of services will include electrical, dimensional, mechanical, pressure and crimping instruments.

"We are extremely pleased to have won the trust and confidence of such an important leader in the international aerospace industry," commented Ronald Barry, Vice-President Business Development of the independent metrology laboratory, founded thirty years ago. "We started providing calibration services to CAE in 2000, and have worked hard to prove we are capable of handling a five-year contract." Since its inception, Ulrich Metrology has focused on providing the highest standards of precision calibration, delivered by a professional team that is committed to rapid response and zero errors.

In addition to testing and certifying instruments at their state-of-the-art laboratories, Ulrich will deliver on-site calibrations to CAE and coordinate tool management logistics. "Precision and commitment to quality are vital components in our business, so it is essential to use measuring devices that have been certified as to their accuracy", explained François Chagnon, Vice-President, Global Strategic Sourcing, CAE. "We have conducted a thorough review and chosen a provider with a proven track record of quality, on-time delivery and a full scope of accredited services."

CAE is a world leader in providing simulation and modelling technologies, and integrated training services to the civil aviation industry and defence forces around the globe. They design, manufacture and supply simulation equipment and offer training and services. This includes integrated modelling, simulation and training solutions for commercial airlines, business aircraft operators, aircraft manufacturers and military organizations and a global network of training centres for pilots, and in some instances, cabin crew and maintenance workers.

With annual revenues of over C\$1 billion, CAE operates in 19 countries around the world. CAE has sold nearly 700 simulators and training devices to airlines, aircraft manufacturers, training centres and defence forces for air and ground purposes in more than 40 countries. They have over 100 full-flight simulators in more than 20 aviation training centres, serving approximately 3,500 airlines, aircraft operators and manufacturers across the globe. CAE licenses its simulation software to various market segments and has a professional services division assisting customers with a wide range of simulation-based needs.

Ulrich Metrology Inc. is a national support partner to leading Canadian companies coast-to-coast. The ISO 17025:2005 accredited facilities are certified by the National Research Council's Calibration Laboratory Assessment Service (CLAS), and are registered with the Canadian Controlled Goods Program (CGP).
